Eng. Abeer Abbas			

	TestCase#	Test Scenario	Test Cases	Test Steps	Test Data	Expected Result	Version Tested	Actual Result	Pass/Fail	Version Tested	Actual Result	Pass/Fail
Technical Requirements	NC1	Verify Customer Name Field (Manager)	Verify that system doesn't allow manager to add a new customer when Customer Name field contains a number	1) Enter a value that contains a number in Customer Name Field 2) Press TAB and move to next field	Customer Name = "Nada 1"	An error message "Numbers are not allowed" must shown	V1	An error message "Numbers are not allowed"	Pass	V2	An error message "Numbers are not allowed"	Pass
	NC2		Verify that system doesn't allow manager to add a new customer when Customer Name field is left blank	1) Do not enter a value in Customer Name Field 2) Press TAB and move to next field	Customer Name = ""	An error message "Customer Name must not be blank" must shown	V1	An error message "Customer Name must not be blank"	Pass	V2	An error message "Customer Name must not be blank"	Pass
	NC3		Verify that system doesn't allow manager to add a new customer when Customer Name field contains special character	1) Enter a value that contains a special character in Customer Name Field 2) Press TAB and move to next field	Customer Name = "Nada@"	An error message "Special characters are not allowed" must shown	V1	An error message "Special characters are not allowed"	Pass	V2	An error message "Special characters are not allowed"	Pass
	NC4		Verify that system doesn't allow manager to add a new customer when first character in customer name has space	1) Enter a value that starts with a space character in Customer Name Field 2) Press TAB and move to next field	Customer Name = " Nada"	An error message "First character can't be space" must shown	V1	An error message "Numbers are not allowed"	Fail	V2	First character can not have space	Pass
	NC5		Verify that systems accepts valid data in Customer Name field	1) Enter test data in Customer Name field 2) Press TAB and move to next field	Customer Name = "Nada"	The system should accept the value without raising any errors	V1	No system error messages	Pass	V2	No system error messages	Pass
	NC6	Verify Address Field (Manager)	Verify that system doesn't allow manager to add a new customer when Address field is left blank	1) Do not enter a value in Address Field 2) Press TAB and move to next field	Address = ""	An error message "Address must not be blank" must shown	V1	No system error messages	Fail	V2	Address Field must not be blank	Pass
	NC7		Verify that system doesn't allow manager to add a new customer when Address field contains special character	1) Enter a value that contains a special character in Address Field 2) Press TAB and move to next field	Address = "New Cairo@"	An error message "Special characters are not allowed" must shown	V1	No system error messages	Fail	V2	Special characters are not allowed	Pass
	NC8		Verify that system doesn't allow manager to add a new customer when first character in Address has space	1) Enter a value that starts with a space character in Address Field 2) Press TAB and move to next field	Address = " New Cairo"	An error message "First character can't be space" must shown	V1	No system error messages	Fail	V2	First character can not have space	Pass
	NC9		Verify that systems accepts valid data in Address field	1) Enter test data in Address Field 2) Press TAB and move to next field	Address = "New Cairo"	The system should accept the value without raising any errors	V1	No system error messages	Pass	V2	No system error messages	Pass
	NC10	Verify City Field (Manager)	Verify that system doesn't allow manager to add a new customer when City field contains a number	1) Enter a value that contains a number in City Field 2) Press TAB and move to next field	City = "Cairo1"	An error message "Numbers are not allowed" must shown	V1	An error message "Numbers are not allowed"	Pass	V2	Numbers are not allowed	Pass
	NC11		Verify that system doesn't allow manager to add a new customer when City field is left blank	1) Do not enter a value in City Field 2) Press TAB and move to next field	City = ""	An error message "City must not be blank" must shown	V1	An error message "City must not be blank" must shown	Pass	V2	City Field must not be blank	Pass
	NC12		Verify that system doesn't allow manager to add a new customer when City field contains special character	1) Enter a value that contains a special character in City Field 2) Press TAB and move to next field	City = "Cairo@"	An error message "Special characters are not allowed" must shown	V1	An error message "Special characters are not allowed"	Pass	V2	Special characters are not allowed	Pass
	NC13		Verify that system doesn't allow manager to add a new customer when first character in City has space	1) Enter a value that starts with a space character in City Field 2) Press TAB and move to next field	City = " Cairo"	An error message "First character can't be space" must shown	V1	An error message "Numbers are not allowed"	Fail	V2	First character can not have space	Pass
	NC14		Verify that system accepts valid data in City field	1) Enter test data in City field 2) Press TAB and move to next field	City = "Cairo"	The system should accept the value without raising any errors	V1	No system error messages	Pass	V2	No system error messages	Pass
	NC15		Verify that system accepts City value that consists of two or more words	1) Enter a City that consists of two or more words 2) Press TAB and move to next field	City = "New York"	The system should accept the value without raising any errors	V1	An error message "Numbers are not allowed"	Fail	V2	No system error messages	Pass
	NC16		Verify that system doesn't allow manager to add a new customer when State field contains a number	1) Enter a value that contains a number in State Field 2) Press TAB and move to next field	State = "Cairo1"	An error message "Numbers are not allowed" must shown	V1	An error message "Numbers are not allowed"	Pass	V2	Numbers are not allowed	Pass
	NC17	Verify State Field (Manager)	Verify that system doesn't allow manager to add a new customer when State field is left blank	1) Do not enter a value in State Field 2) Press TAB and move to next field	State = ""	An error message "State must not be blank" must shown	V1	An error message "State must not be blank" must shown	Pass	V2	State must not be blank	Pass
	NC18		Verify that system doesn't allow manager to add a new customer when State field contains special character	1) Enter a value that contains a special character in State Field 2) Press TAB and move to next field	State = "Cairo@"	An error message "Special characters are not allowed" must shown	V1	An error message "Special characters are not allowed"	Pass	V2	Special characters are not allowed	Pass
	NC19		Verify that system doesn't allow manager to add a new customer when first character in State has space	1) Enter a value that starts with a space character in State Field 2) Press TAB and move to next field	State = " Cairo"	An error message "First character can't be space" must shown	V1	An error message "Numbers are not allowed"	Fail	V2	First character can not have space	Pass
	NC20		Verify that systems accepts valid data in State field	1) Enter test data in State field 2) Press TAB and move to next field	State = "Cairo"	The system should accept the value without raising any errors	V1	No system error messages	Pass	V2	No system error messages	Pass
	NC21		Verify that system accepts State value that consists of two or more words	1) Enter a State that consists of two or more words 2) Press TAB and move to next field	State = "New York"	The system should accept the value without raising any errors	V1	An error message "Numbers are not allowed"	Fail	V2	No system error messages	Pass
	NC22	Verify PIN Field (Manager)	Verify that system doesn't allow manager to add a new customer when PIN field contains a character	1) Enter a value that contains a number in PIN Field 2) Press TAB and move to next field	PIN = "Nada"	An error message "Characters are not allowed" must shown	V1	An error message "Characters are not allowed"	Pass	V2	Characters are not allowed	Pass
	NC23		Verify that system doesn't allow manager to add a new customer when PIN field is left blank	1) Do not enter a value in PIN Field 2) Press TAB and move to next field	PIN = ""	An error message "PIN must not be blank" must shown	V1	An error message "PIN must not be blank"	Pass	V2	PIN Code must not be blank	Pass
	NC24		Verify that system doesn't allow manager to add a new customer when PIN field contains special character	1) Enter a value that contains a special character in PIN Field 2) Press TAB and move to next field	PIN = "12345@"	An error message "Special characters are not allowed" must shown	V1	An error message "Special characters are not allowed"	Pass	V2	Special characters are not allowed	Pass
	NC25		Verify that system doesn't allow manager to add a new customer when first character in PIN has space	1) Enter a value that starts with a space character in PIN Field 2) Press TAB and move to next field	PIN = " 12345"	An error message "First character can't be space" must shown	V1	No system error messages	Fail	V2	First character can not have space	Pass
	NC26		Verify that system doesn't allow manager to add a new customer when PIN value is not equal to 6-digits	1) Enter a value that is less than 6 digits in PIN Field 2) Press TAB and move to next field	PIN = "123"	An error message "PIN must have 6-digits" must shown	V1	An error message "PIN Code must have 6 Digits"	Pass	V2	PIN Code must have 6 Digits	Pass
	NC27		Verify that system allows manager to add a new customer when PIN value is 6-digits	1) Enter a 6-digits value in PIN Field 2) Press TAB and move to next field	PIN = "123456"	Customer Should be added successfully	V1	No system error messages	Pass	V2	No system error messages	Pass
	NC28		Verify that system doesn't allow manager to add a new customer when Mobile Number field contains a character	1) Enter a value that contains a character in Mobile Number Field 2) Press TAB and move to next field	Mobile number = "N1234"	An error message "Characters are not allowed" must shown	V1	An error message "Characters are not allowed"	Pass	V2	Characters are not allowed	Pass
	NC29	Verify Mobile number Field (Manager)	Verify that system doesn't allow manager to add a new customer when Mobile Number field is left blank	1) Do not enter a value in Mobile Number Field 2) Press TAB and move to next field	Mobile number = ""	An error message "Mobile Number must not be blank" must shown	V1	An error message "Mobile Number must not be blank"	Pass	V2	Mobile no must not be blank	Pass
	NC30		Verify that system doesn't allow manager to add a new customer when Mobile Number field contains special character	1) Enter a value that contains a special character in Mobile Number Field 2) Press TAB and move to next field	Mobile number = "123@"	An error message "Special characters are not allowed" must shown	V1	An error message "Special characters are not allowed"	Pass	V2	Special characters are not allowed	Pass
	NC31		Verify that system doesn't allow manager to add a new customer when first character in Mobile Number has space	1) Enter a value that starts with a space character in Mobile Number Field 2) Press TAB and move to next field	Mobile number = " 123"	An error message "First character can't be space" must shown	V1	No system error messages	Fail	V2	First character can not have space	Pass
	NC32		Verify that systems accepts valid data in Mobile number field	1) Enter test data in Mobile number field 2) Press TAB and move to next field	Mobile number = "123"	The system should accept the value without raising any errors	V1	No system error messages	Pass	V2	No system error messages	Pass

	NC33	Verify Email Field (Manager)	Verify that system doesn't allow manager to add a new customer when Email field is left blank	1) Do not enter a value in Email Field 2) Press TAB and move to next field 1) Enter an invalid Email ID in Email Field 2) Press TAB and move to next field	Email = ""	An error message "Email must not be blank" must shown	V1	An error message "Email must not be blank"	Pass	V2	Email-ID must not be blank	Pass
	NC34		Verify that system doesn't allow manager to add a new customer when Email ID is not valid	1) Enter a value that starts with a space character in Email Field 2) Press TAB and move to next field	Email = "Nada"	An error message "Invalid Email ID" must shown	V1	An error message "Email-ID is not valid"	Pass	V2	Email-ID is not valid First character can not have space	Pass
	NC35		Verify that system doesn't allow manager to add a new customer when first character in Email has space	1) Enter an Email ID that is already exists in the system in Email Field 2) Press Submit	Email = " nada@gmail.com"	An error message "First character can't be space" must shown	V1	No system error messages	Fail	V2		Pass
Functional Requirements	NC36	Manager	Verify that system doesn't allow manager to add a new customer when Email ID is already exists in the system	1) Enter an Email ID that is already exists in the system in Email Field 2) Press Submit	Email = "nada@gmail.com"	An error message "Email ID already exists" must shown	V1		Not Executed	V2	Email Address Already Exist !!	Pass
	NC37		Verify that manager can add a new customer	1) Enter test data in all fields 2) Press Submit	Nada Female 25/8/2000 Address - New Cairo City - Cairo State - Cairo PIN - 123456 Mobile Number- 123 Email - nada@gmail.com and submit	Customer added successfully !	V1	An error message "Connection failed: Access denied for user 'root'@'localhost' (using password: NO)"	Fail	V2	Customer added successfully !	Pass
User Interface Requirements	NC38	Test New Customer Page UI	Verify that all the fields in New Customer Page are as documented in the SRS	1) Login as Manager 2) Navigate to New Customer Page	Customer Name Gender Date of Birth Address City State PIN Mobile Number Email Id Submit Reset		V1	Customer Name Gender Date of Birth Address City State PIN Mobile Number Email Id Submit Reset	Pass	V2	Customer Name Gender Date of Birth Address City State PIN Mobile Number Email Id Submit Reset	Pass
	NC39		Verify all mandatory fields are marked as required		*Customer Name *Gender *Date of Birth *Address *City *State *PIN *Mobile Number *Email Id		V1	*Customer Name *Gender *Date of Birth *Address *City *State *PIN *Mobile Number *Email Id	Fail	V2	Customer Name Gender Date of Birth Address City State PIN Mobile Number Email Id	Fail

	TestCase#	Test Scenario	Test Cases	Test Steps	Test Data	Expected Result	Version Tested	Actual Result	Pass/Fail	Version Tested	Actual Result	Pass/Fail
Technical Requirements	EC1	Verify Customer Id Field (Manager)	Verify that system doesn't allow manager to Edit a Customer when Customer ID field is left blank	1) Do not enter a value in Customer ID Field 2) Press TAB and move to next field	Customer ID = ""	An error message "Customer ID must not be blank" must shown	V1	An error message "Customer ID is required"	Pass	V2	Customer ID is required	Pass
	EC2		Verify that system doesn't allow manager to Edit a Customer when Customer ID field contains special character	1) Enter a value that contains a special character in Customer ID Field 2) Press TAB and move to next field	Customer ID = "123@"	An error message "Special characters are not allowed" must shown	V1	An error message "Special characters are not allowed"	Pass	V2	Special characters are not allowed	Pass
	EC3		Verify that system doesn't allow manager to Edit a Customer when first character in Customer ID has space	1) Enter a value that starts with a space character in Customer ID Field 2) Press TAB and move to next field	Customer ID = " 123"	An error message "First character can't be space" must shown	V1	No system error messages	Fail	V2	First character can not have space	Pass
	EC4		Verify that system doesn't allow manager to Edit a Customer when Customer ID field contains a character	1) Enter a value that contains a character in Customer ID Field 2) Press TAB and move to next field	Customer ID = "N123"	An error message "Characters are not allowed" must shown	V1	No system error messages	Fail	V2	Characters are not allowed	Pass
	EC5		Verify that system doesn't allow manager to Edit a Customer when Customer ID field consists of characters	1) Enter a value that consists of characters in Customer ID Field 2) Press TAB and move to next field	Customer ID = "Nada"	An error message "Characters are not allowed" must shown	V1	An error message "Characters are not allowed"	Pass	V2	Characters are not allowed	Pass
	EC6	Verify Address Field (Manager)	Verify that the system allows manager to enter edit customer page with valid data	1) Login as Manager 2) Navigate to Edit Customer Page 3) Write a valid ID in Customer ID field 4) Press Submit	CustomerID = 46382	You should be redirected to Edit customer details page	V1		Not Executed	V2	Edit customer details page	Pass
	EC7		Verify that system doesn't allow manager to Edit a customer when Address field is left blank	1) Do not enter a value in Address Field 2) Press TAB and move to next field	Address = ""	An error message "Address must not be blank" must shown	V1		Not Executed	V2	Address Field must not be blank	Pass
	EC8		Verify that system doesn't allow manager to Edit a customer when Address field contains special character	1) Enter a value that contains a special character in Address Field 2) Press TAB and move to next field	Address = "New Giza@"	An error message "Special characters are not allowed" must shown	V1		Not Executed	V2	Special characters are not allowed	Pass
	EC9		Verify that system doesn't allow manager to Edit a customer when Address has space	1) Enter a value that starts with a space character in Address Field 2) Press TAB and move to next field	Address = " New Giza"	An error message "First character can't be space" must shown	V1		Not Executed	V2	First character can not have space	Pass
	EC10		Verify that systems accepts valid data in Address field	1) Enter test data in Address field 2) Press TAB and move to next field	Address = "New Giza"	The system should accept the value without raising any errors	V1		Not Executed	V2	No system errors	Pass
	EC11	Verify City Field (Manager)	Verify that system doesn't allow manager to Edit a customer when City field contains a number	1) Enter a value that contains a number in City Field 2) Press TAB and move to next field	City = "Giza1"	An error message "Numbers are not allowed" must shown	V1		Not Executed	V2	Numbers are not allowed	Pass
	EC12		Verify that system doesn't allow manager to Edit a customer when City field is left blank	1) Do not enter a value in City Field 2) Press TAB and move to next field	City = ""	An error message "City must not be blank" must shown	V1		Not Executed	V2	City Field must not be blank	Pass
	EC13		Verify that system doesn't allow manager to Edit a customer when City field contains special character	1) Enter a value that contains a special character in City Field 2) Press TAB and move to next field	City = "Giza@"	An error message "Special characters are not allowed" must shown	V1		Not Executed	V2	Special characters are not allowed	Pass
	EC14		Verify that system doesn't allow manager to Edit a customer when first character in City has space	1) Enter a value that starts with a space character in City Field 2) Press TAB and move to next field	City = " Giza"	An error message "First character can't be space" must shown	V1		Not Executed	V2	First character can not have space	Pass
	EC15		Verify that systems accepts valid data in City field	1) Enter test data in City field 2) Press TAB and move to next field	City = "Giza"	The system should accept the value without raising any errors	V1		Not Executed	V2	No system errors	Pass
	EC16	Verify State Field (Manager)	Verify that system accepts City value that consists of two or more words	1) Enter a City that consists of two or more words 2) Press TAB and move to next field	City = "New York"	The system should accept the value without raising any errors	V1		Not Executed	V2	No system errors	Pass
	EC17		Verify that system doesn't allow manager to Edit a customer when State field contains a number	1) Enter a value that contains a number in State Field 2) Press TAB and move to next field	State = "Giza1"	An error message "Numbers are not allowed" must shown	V1		Not Executed	V2	Numbers are not allowed	Pass
	EC18		Verify that system doesn't allow manager to Edit a customer when State field is left blank	1) Do not enter a value in State Field 2) Press TAB and move to next field	State = ""	An error message "State must not be blank" must shown	V1		Not Executed	V2	State must not be blank	Pass
	EC19		Verify that system doesn't allow manager to Edit a customer when State field contains special character	1) Enter a value that contains a special character in State Field 2) Press TAB and move to next field	State = "Giza@"	An error message "Special characters are not allowed" must shown	V1		Not Executed	V2	Special characters are not allowed	Pass
	EC20		Verify that system doesn't allow manager to Edit a customer when first character in State has space	1) Enter a value that starts with a space character in State Field 2) Press TAB and move to next field	State = " Giza"	An error message "First character can't be space" must shown	V1		Not Executed	V2	First character can not have space	Pass
	EC21	Verify PIN Field (Manager)	Verify that systems accepts valid data in State field	1) Enter test data in State field 2) Press TAB and move to next field	State = "Giza"	The system should accept the value without raising any errors	V1		Not Executed	V2	No system errors	Pass
	EC22		Verify that system accepts State value that consists of two or more words	1) Enter a State that consists of two or more words 2) Press TAB and move to next field	State = "New York"	The system should accept the value without raising any errors	V1		Not Executed	V2	No system errors	Pass
	EC23		Verify that system doesn't allow manager to Edit a customer when PIN field contains a character	1) Enter a value that contains a number in PIN Field 2) Press TAB and move to next field	PIN = "Sara"	An error message "Characters are not allowed" must shown	V1		Not Executed	V2	Characters are not allowed	Pass
	EC24		Verify that system doesn't allow manager to Edit a customer when PIN field is left blank	1) Do not enter a value in PIN Field 2) Press TAB and move to next field	PIN = ""	An error message "PIN must not be blank" must shown	V1		Not Executed	V2	PIN Code must not be blank	Pass
	EC25		Verify that system doesn't allow manager to Edit a customer when PIN field contains special character	1) Enter a value that contains a special character in PIN Field 2) Press TAB and move to next field	PIN = "45678@"	An error message "Special characters are not allowed" must shown	V1		Not Executed	V2	Special characters are not allowed	Pass
	EC26	Verify Mobile number Field (Manager)	Verify that system doesn't allow manager to Edit a customer when PIN field contains special character	1) Enter a value that starts with a space character in PIN Field 2) Press TAB and move to next field	PIN = " 45678"	An error message "First character can't be space" must shown	V1		Not Executed	V2	First character can not have space	Pass
	EC27		Verify that system doesn't allow manager to Edit a customer when PIN value is not equal to 6-digits	1) Enter a value that is less than 6 digits in PIN Field 2) Press TAB and move to next field	PIN = "456"	An error message "PIN must have 6-digits" must shown	V1		Not Executed	V2	PIN Code must have 6 Digits	Pass
	EC28		Verify that system doesn't allow manager to Edit a customer when PIN value is 6-digits	1) Enter a 6-digits value in PIN Field 2) Press TAB and move to next field	PIN = "456789"	No system errors	V1		Not Executed	V2	No system errors	Pass
	EC29		Verify that system doesn't allow manager to Edit a customer when Mobile Number field contains a character	1) Enter a value that contains a character in Mobile Number Field 2) Press TAB and move to next field	Mobile number = "N4564"	An error message "Characters are not allowed" must shown	V1		Not Executed	V2	Characters are not allowed	Pass
	EC30		Verify that system doesn't allow manager to Edit a customer when Mobile Number field is left blank	1) Do not enter a value in Mobile Number Field 2) Press TAB and move to next field	Mobile number = ""	An error message "Mobile Number must not be blank" must shown	V1		Not Executed	V2	Mobile no must not be blank	Pass
	EC31	Verify Mobile number Field (Manager)	Verify that system doesn't allow manager to Edit a customer when Mobile Number field contains special character	1) Enter a value that contains a special character in Mobile Number Field 2) Press TAB and move to next field	Mobile number = "456@"	An error message "Special characters are not allowed" must shown	V1		Not Executed	V2	Special characters are not allowed	Pass
	EC32		Verify that system doesn't allow manager to Edit a customer when first character in Mobile Number has space	1) Enter a value that starts with a space character in Mobile Number Field 2) Press TAB and move to next field	Mobile number = " 456"	An error message "First character can't be space" must shown	V1		Not Executed	V2	First character can not have space	Pass
	EC33		Verify that systems accepts valid data in Mobile number field	1) Enter test data in Mobile number field 2) Press TAB and move to next field	Mobile number = "456"	The system should accept the value without raising any errors	V1		Not Executed	V2	No system errors	Pass
	EC34		Verify that system doesn't allow manager to Edit a customer when Email field is left blank	1) Do not enter a value in Email Field 2) Press TAB and move to next field	Email = ""	An error message "Email must not be blank" must shown	V1		Not Executed	V2	Email-ID must not be blank	Pass

	EC35	Verify Email Field (Manager)	Verify that system doesn't allow manager to Edit a customer when Email ID is not valid	1) Enter an invalid Email ID in Email Field 2) Press TAB and move to next field	Email = "Sara"	An error message "Invalid Email ID" must shown	V1		Not Executed	V2	Email-ID is not valid	Pass
	EC36		Verify that system doesn't allow manager to Edit a customer when first character in Email has space	1) Enter a value that starts with a space character in Email Field 2) Press TAB and move to next field	Email = " Sara@example.com"	An error message "First character can't be space" must shown	V1		Not Executed	V2	First character can not have space	Pass
	EC37		Verify that systems accepts valid data with right format in Email field	1) Enter test data in Email field 2) Press TAB and move to next field	Email = "Sara@example.com"	The system should accept the value without raising any errors	V1		Not Executed	V2	No system errors	Pass
Functional Requirements	EC38	Manager	Verify that system allows manager to Edit a Customer when Customer ID is associated with a manager	1) Enter a Customer ID that associated with a manager in the Customer ID field 2) Press Submit		The system should redirect the manager to the customer details page	V1		Not Executed	V2	customer details page	Pass
	EC39		Verify that system doesn't allow manager to Edit a customer when Email ID is already exists in the system	1) Enter an Email ID that is already exists in the system in Email Field 2) Press Submit		An error message "Email ID already exists" must shown	V1		Not Executed	V2	Email edited successfully	Fail
	EC40		Verify that system doesn't allow manager to Edit a customer when Customer ID is not valid	1) Enter an invalid Customer ID in Customer ID Field 2) Press Submit		An error message "Invalid Customer ID" must shown	V1		Not Executed	V2	You are not authorize to edit this customer!!	Fail
	EC41		Verify that systems allows manager to edit customer when all the data is valid	1) Fill all fields with test data 2) Press submit	"Nada" Female 25/8/2000 Address - New Cairo City - Cairo State - Giza PIN - 123456 Telephone - 46382 Email - nada@gmail.com and submit"	a message "Customer edited successfully" must shown	V1	Connection error	Not Executed		No Changes made to Customer records	Fail
	EC42	Customer	Verify that system doesn't allow manager to Edit a customer when Customer ID is not associated with a manager	1) Enter a Customer ID in Customer ID field 2) Press TAB and move to the next field		An error message "You are not authorized" to make this action" must shown	V1		Not Executed	V2		Not Executed
User Interface Requirements	EC43	Test Edit Customer Page UI		Verify that all the fields in Edit Customer Page are as documented in the SRS	1) Login as Manager 2) Navigate to Edit Customer Page	Customer Id Submit Reset	V1	Customer Id Submit Reset	Pass	V2	Customer Id Submit Reset	Pass
	EC44			Verify all mandatory fields are marked as required		*Customer Id	V1	*Customer Id	Pass	V2	*Customer Id	Pass
	EC45	Test Form after submitting Edit Customer UI			1) Enter a valid Customer ID in Customer ID field 2) Press Submit	Customer Name (Disabled) Gender (Disabled) Date of Birth (Disabled) Address City State PIN Mobile Number Email Id Submit Reset					Customer Name (Disabled) Gender (Disabled) Date of Birth (Disabled) Address City State PIN Mobile Number Email Id Submit Reset	
				Verify that all the fields in Form after submitting Edit Customer Page are as documented in the SRS			V1		Not Executed	V2		Pass

	TestCase#	Test Scenario	Test Cases	Test Steps	Test Data	Expected Result	Version Tested	Actual Result	Pass/Fail	Version Tested	Actual Result	Pass/Fail
Technical Requirements	NA1	Verify Customer Id Field (Manager)	Verify that system doesn't allow manager to Add a new account when Customer ID field is left blank	1) Do not enter a value in Customer ID Field 2) Press TAB and move to next field	Customer ID = ""	An error message "Customer ID must not be blank" must shown	V1	No system error messages	Fail	V2	Customer ID is required	Pass
	NA2		Verify that system doesn't allow manager to Add a new account when Customer ID field contains special character	1) Enter a value that contains a special character in Customer ID Field 2) Press TAB and move to next field	Customer ID = "123@"	An error message "Special characters are not allowed" must shown	V1	No system error messages	Fail	V2	Special characters are not allowed	Pass
	NA3		Verify that system doesn't allow manager to Add a new account when first character in Customer ID has space	1) Enter a value that starts with a space character in Customer ID Field 2) Press TAB and move to next field	Customer ID = " 123"	An error message "First character can't be space" must shown	V1	No system error messages	Fail	V2	First character can not have space	Pass
	NA4	Verify Account Type Field (Manager)	Verify that system doesn't allow manager to Add a new account when Customer ID field contains a character	1) Enter a value that contains a character in Customer ID Field 2) Press TAB and move to next field	Customer ID = "N123"	An error message "Characters are not allowed" must shown	V1	No system error messages	Fail	V2	Characters are not allowed	Pass
	NA5		Verify that the Account type dropdown list contains the right data	1) Click on Account type Field		Two options : (Savings - Current) should be displayed	V1	Two options : (Savings - Current)	Pass	V2	Two options : (Savings - Current)	Pass
	NA6		Verify that the Account type dropdown list default is Savings			The Account type field must show "Savings"	V1	The Account type field shows "Savings"	Pass	V2	The Account type field shows "Savings"	Pass
	NA7	Verify Initial Deposit Field (Manager)	Verify that the Account type dropdownlist reflects the right selection	1) Go to New Account page 1) Click on Account type Field 2) Select one of the options displayed	Account type = "Current"	The selected option must be displayed on Account type field	V1	Current	Pass	V2	Current	Pass
	NA8		Verify that system doesn't allow manager to Add a new account when Initial deposit field contains a character	1) Enter a value that contains a character in Initial deposit Field 2) Press TAB and move to next field	Initial deposit = "N55"	An error message "Characters are not allowed" must shown	V1	No system error messages	Fail	V2	Characters are not allowed	Pass
	NA9		Verify that system doesn't allow manager to Add a new account when Initial Deposit field is left blank	1) Do not enter a value in Initial Deposit Field 2) Press TAB and move to next field	Initial deposit = ""	An error message "Initial Deposit must not be blank" must shown	V1	No system error messages	Fail	V2	Initial Deposit must not be blank	Pass
Functional Requirements	NA10	Manager	Verify that system doesn't allow manager to Add a new account when Customer ID is not valid	1) Enter an invalid Customer ID in Customer ID Field 2) Press Submit	Customer ID = "000000"	An error message "Invalid Customer ID" must shown		Connection failed: Access denied for user 'root'@'localhost' (using password: NO)	Fail	V2	You are not authorize to Add Account for this Customer	Fail
	NA11		Verify that system doesn't allow manager to Add a new account when Initial deposit is less than 500	1) Enter a value less than 500 in Initial deposit field 2) Press Submit	Initial deposit = "55"	An error message "Initial deposit must be 500 or above" must shown		No system error messages	Fail	V2	Initial deposit must be Rs. 500 or more	Pass
	NA12	Customer	Verify that system doesn't allow manager to Add a new account when Customer ID is not associated with manager	1) Enter a Customer ID in Customer ID field 2) Press Submit	Customer ID = 46382	An error message "You are not authorized" to make this action" must shown			Not Executed	V2		Not Executed
	NA13		Verify that systems allows manager to edit customer when data is valid	1) fill all fields with test data 2) Press Submit	Account type = "Current" Initial deposit = 5000	The system should accept the value without raising any errors			Not Executed	V2	Account generated successfully !! Account no. : 128967	Pass
User Interface Requirements	NA14	Test New Account Page UI	Verify that all the fields in New Account Page are as documented in the SRS	1) Login as Manager 2) Navigate to New Account Page		Customer Id Account Type (dropdown list) Initial deposit Submit Reset		Customer Id Account Type (dropdown list) Initial deposit Submit Reset	Pass	V2	Customer Id Account Type (dropdown list) Initial deposit Submit Reset	Pass

	TestCase#	Test Scenario	Test Cases	Test Steps	Test Data	Expected Result	Version Tested	Actual Result	Pass/Fail	Version Tested	Actual Result	Pass/Fail
